

VERY IMPORTANT INVITATION PROJECT

February 2024 Newsletter

Written by Laura Cobbold, Cervical Cytology Nurse, Trainer & Assessor

New Cervical Screening Management System is coming in April time...

With the new system, accuracy and security of patient information will be improved, making sure every person eligible for a screening appointment continues to be invited on time and followed up if required.

As a team we are keeping up to date with all changes relating to this and are excited to see what the new system brings!

AXA XL health promotion event

Laura & Ashleigh attended AXA XL to facilitate a pop-up stand and education session around cervical screening and HPV awareness. The pop-up was very popular and effective and the presentation was joined by 12 staff members. Its great to see companies investing their time into health and raising awareness for these topics. Well done AXA XL!
